

PROJECT INFORMATION

Route 19, Crawford County

PROJECT LOCATION: Route 19 from Enterprise Drive south to Winklemann Road.

PROJECT LENGTHS: 2.19 miles on Route 19.

DESIGN TRAFFIC:

Construction Year ADT (2011):	6,300
Design Year ADT (2031):	8,180

PROPOSED IMPROVEMENTS: Overlay existing Route 19 with 1 ¾" asphalt and construct 4' wide paved shoulders. Additionally, improvements are planned to the curve adjacent to Village at Four Condo's Subdivision. Two options, for this curve, are being proposed for your consideration and comments. Option 'A' consists of curve realignment to reduce the sharpness of the existing curve and Option 'B' consists of widening of the northbound and southbound lanes, adding paved shoulders and roadway cross-slope correction. This project will improve safety by providing a smooth driving surface, paved shoulders, center/edgeline rumblestripes, and curve improvements.

HANDLING TRAFFIC: Route 19 will be placed into a one-lane two-way flagging operation during daytime hours and opened back to normal traffic during nighttime hours.

RIGHT OF WAY: Option 'A' will require new right of way (see Option 'A' drawing).
Option 'B' does not require new right of way (see Option 'B' drawing).

PROJECT COST DATA: Construction Estimate - \$536,000

PROJECT SCHEDULE: Begin Construction Spring 2011
